CONTENTS FOR
Heat Transfer–Soviet Research
Volume 18, Nos. 1–6, 1986

Number 1

1 Investigation of Unsteady-State Heat Transfer for Plane and Axisymmetric Flows
V.L. Sergeyev and L.A. Sergeyeva

56 Influence of Unheated End Shape on Heat Transfer from a Longitudinally Streamlined Cylinder
L.E. Yushina

60 The Effects of Elastic Deformations in the Flow of Polymer Solutions
V.M. Entov

74 Hydrodynamics and Heat Transfer in Highly Viscous Rheological Media Flow
G.B. Froishteter

86 Electrodiffusion Diagnosis of Rheological and Rheodynamic Characteristics of Viscoelastic and Nonlinear-Viscoplastic Fluids
N.A. Pokryvaylo, O. Wein, V.V. Tovchigrechko, N.D. Kovalevskaya and T.V. Yushkina

98 Convective Transfer Processes in Nonlinear Hereditary Fluids with Elastic Properties
B.M. Khusid

108 Local Coefficients of Heat Transfer from Staggered Bundles of Rough Tubes in Crossflow
A.A. Žukauskas, R.V. Ulinskas and P.I. Daunoras

118 Effect of Type of Deflector on the Internal Heat Transfer in Blades with Crossflow of Cooling Gas
A.N. Boyko, M.N. Galkin, S.Z. Kopelev and I.V. Shevchenko

125 Mathematical Aspects of the Theory of Diffraction as Applied to Thermal Radiation Transfer
T.P. Ryzhkova and L.I. Ryzhkov

134 Effect of Pressure on the Departing Bubble and Other Parameters of Boiling of Liquid Potassium
V.F. Prisnyakov and S.V. Tkachenko

138 Heat Transfer in the Thermal Inlet Region in Laminar Flow of Toluene at Supercritical Velocities
F.I. Kalbaliev and F.K. Babayev

Number 2

i In Memoriam Professor S.S. Kutateladze 1914-1986
R.I. Soloukhin and O.G. Martynenko

1 Heat Transfer Behavior of Vibrating Tubes Operating in Cross-flow. 1. Temperature and Velocity Fluctuations
V.I. Katinas, A.A. Markevičius and A.A. Žukauskas

10 Heat Transfer Behavior of Vibrating Tubes Operating in Cross-flow. 2. Local and Average Heat Transfer Coefficients
V.I. Katinas, A.A. Markevičius and A.A. Žukauskas

18 Heat Transfer in the Thermal Entry Region in Laminar Downflow of a Liquid Film over a Cylindrical Surface
V.M. Sobin

23 Thermal Calculation of Bubbling-Type Evaporators
A.N. Alabovskiy

29 Maximum Heat Flux Transferrable by Thermosiphons Operating with a Sulfur-Iodine Mixture at Temperatures of 600 to 900°K
I.L. Shilovich, I.E. Veneraki, V.S. Mel'nichenko and Ye.N. Panov

35 Influence of the Inclination Angle of a Two-Phase Thermosiphon on the Limiting Heat Flux
I.L. Pioro

39 Radiative Heat Transfer in a Truncated-Cone Chamber in Which the Heat Source Lies within the Gas Space
S.N. Gorshkova

44 Polynomial Approximations of the Solution of One-Dimensional Heat-Transfer Problems
V.V. Deyneko

53 Effect of Particle Size of Plasma-Deposited Coating on the Coefficient of Boiling Heat Transfer
N.Yu. Ostrovskiy

58 Heat Transfer from Waves Impacting on an Ice Surface
Ye.S. Gogolev and A.N. Krasavin

63 Reinforcement of Ice Bridges over Rivers via Layer-by-Layer Ice Buildup
P.A. Vislobitskiy, A.I. Titarenko and N.G. Shpet

71 A Mathematical Model of Fluidized-Bed Drying of Granular Solids
V.B. Sazhin, A.A. Oygenblik, I.N. Dorokhov and V.V. Kafarov

81 Fluidized Bed Heat Exchange with a Submerged Heat Surface
S.A. Nagornov and G.G. Serebrennikov

86 Turbulent Energy Balance for Gas Flow in Rough Tubes
E.V. Ushpuras

91 Flow and Heat Transfer in Flow Past Barriers in a Turbulent Boundary Layer
G.P. Zigmantsas and R.B. Shlyazhas

97 Calculation of Slow Viscous Heat Conducting Gas Flows at Moderate and Large Reynolds Numbers
Yu.N. Makarov

104 Calculation of the Equilibrium Load for Simultaneous Nucleate and Film Boiling
N.P. Timchenko

110 Onset of Boiling on a Wick-Covered Wall
V.I. Tolubinskiy, V.A. Antonenko and G.V. Ivanenko
118 Effect of Thickness of the Capillary Porous Coating Boiling Heat Transfer to Mixtures
N.Yu. Ostrovskiy
123 Heat Transfer to Liquids Boiling in Porous Structures
Yu.V. Navruzov
129 Transfer of Heat from Fins Operating in Longitudinal Flow
O.I. Didenko and O.D. Lipovetskaya
136 A Conjugate Problem of the Calculation of High-Temperature Heat Pipe Parameters
V.I. Lutsenko
143 A Thermodynamic Method for Measuring the Local Percentage of Liquid Water in Steam
V.I. Fedorov, N.V. Fedorov and N.Ye. Balenko

Number 3

1 Turbulent Heat Transfer in a Swirled Wall Jet in a Channel
N.A. Dvornikov
10 Numerical Solution of the Problem of Mass Transfer in a Wavy Liquid Film
A.M. Lapin
15 Natural Convection Heat Transfer in Horizontal Tube Banks
S.E. Gusev
21 Unsteady-State Convective Heat Transer in Annular Channels and Rod Bundles
E.I. Kalinin
29 The Rate of Change of Coolant Properties Upon Loss of Pressure in the Coolant Circulation Loop
V.V. Fisenko, A.V. Alferov and V.Yu. Kaminskiy
34 Submerged Jets of a Non-Newtonian Power-Law Fluid
Z.P. Shulman, V.I. Korobko and V.K. Shashmin
51 Heat Transfer and Capillary Retention of Liquid in Quiescent Vapor Condensation on a Horizontal Finned Cylinder
I.I. Gogonin and O.A. Kabov
58 Liquid Evaporation Heat Transfer on a Porous Surface
S.L. Soloviyov
65 Heat Transfer Intensity and Critical Heat Flux Densities in Boiling of Liquid on a Microsurface
G.R. Kudritskiy
70 Mass Transfer from Single Taylor Bubbles
A.V. Petukhov and A.V. Fominykh
76 Experimental Investigation of Heat Transfer in Moving Vapor Condensation
S.I. Lazarev
83 Burn-Out Heat Transfer in Unsteady-State Heat Generation in a Cryogenic Fluid
A.N. Pavlenko and V.Yu. Chekhovich

95 Heat Transfer to Multistage Cones at Hypersonic Velocities
V.N. Brazhko, G.G. Nerserov and N.N. Shkirin
104 Determination of the Temperature of Gas in Nonequilibrium Plasma from Measurement of Spectral Line Shapes
D.K. Otorbayev, V.N. Ochkin, S.Yu. Savinov and N.N. Sobolev
116 New Total-Radiation Radiometers and Pyrometers
S.A. Sazhina and E.M. Malaya
123 Classification of Thermal Systems of Thermoelectric Generators
Yu.N. Lobunets
128 Determination of Temperature-Dependent Nonlinear Thermophysical Characteristics from Unsteady-State Experiments
Yu.A. Kovalenko
135 Liquid-Crystal Heat Flux Indicators
G.M. Zharkova, G.A. Kiselev and V.M. Khachaturyan
140 Procedure for Correcting the Values of Specific Heat Measured with a Differential Scanning Calorimeter
V.I. Kulagin and A.A. Raskin

Number 4

1 Discrepancies between Experimental Data on Burnout Heat Transfer in Channels
V.I. Tolubinskiy and E.D. Domashev
21 An Approximate Theory for Calculating Three-Dimensional Heat Screens
V.M. Repukhov
52 Combined Heat Transfer over the Initial Segment of a Plate in a Flow
A.Sh. Dorfman
75 Heat and Mass Transfer of a Vapor-Gas Mixture in Film Condensation
N.I. Nikitenko and V.A. Yatsevskiy
86 Heat Transfer Intensification in Duct Flow of Heat Carriers
V.I. Tolubinsky and N.A. Minyailenko
107 Heat Transfer of Rapidly Moving Droplets Interacting with a Wall
A.A. Shraiber and S.L. Khelemskiy
113 Characteristics of Turbulized Flows and Their Application to the Study of Transfer Processes
E.Ya. Èpik
136 Mass Transfer on Collision of Droplets with a Solid Spherical Particle
A.M. Podvysotskiy and V.V. Dubrovskiy

Number 5

1 Momentum, Energy and Mass Transfer in Variable Cross-Section Channels (1. Analytic Study of Flow in Circular Ducts)
V.A. Šidlauskas and M.M. Tamonis

14 Dynamics of Heat Transfer in a Heated Duct with Continuously Varying Coolant Flowrate
B.P. Korol'kov and E.A. Tairov
21 Thermohydraulic Performance of Bundles of Twisted Oval Tubes Operating in Crossflow
A.A. Žukauskas, R.I. Janauskas and V.J. Survila
35 Mathematical Modeling and Investigation of Transients in Elements of a Wet-Steam Loop
V.I. Fedorov and N.G. Vorob'yeva
44 A Method of Evaluating Heat Transfer in Multilayered Semi-transparent Materials
V.P. Timoshenko and M.G. Trenev
58 Engineering Calculation of the Temperature Fields in a Multi-layer Plate Heated under Boundary Conditions of the First Kind
L.A. Brovkin and L.A. Guzov
65 Heat Transfer and Statistical Characteristics of the Temperature Field in a Horizontal Layer of Liquid Heated from Below
V.S. Berdnikov and V.A. Markov
73 New Methods for Calculating the Properties of Liquid-Metal Heat Transfer Fluids
L.P. Filippov and L.A. Blagonravov
80 Selection of a Nonideality Criterion for Heat Pipes
L.L. Vasil'yev, S.V. Konev and Rakhmani Razek
88 Low-Threshold Optical Breakdown of Gases near a Surface (A survey of experimental and theoretical works)
A.M. Bonch-Bruyevich, I.A. Didenko and L.N. Kaporskiy
134 Effect of Vapor Velocity on Local Heat Transfer and Friction Coefficients in Film Condensation of Nitrogen Tetroxide in a Vertical Tube
A.Ye. Sinkevich
144 Correlations for Unsteady-State Heat Transfer to a Turbulent Flow of Gas not in Chemical Equilibrium
A.N. Devoyno and S.V. Chernousov

Number 6

1 Enhancement of Convective Heat Transfer in Tube Bundles Operating in Axial Flow
A.A. Gukhman, V.A. Kirpikov and A.P. Zyuzin
6 Effect of Surfactants on Pool Boiling Heat Transfer
G.A. Saltanov, A.N. Kukushin, V.K. Shanin, Yu.A. Kuzman-Kichta, V.N. Satsenko and E. Chempik
12 Enhancement of Convective Heat Transfer in Capillary-Porous Cooling Systems
V.I. Subbotin, V.V. Kharitonov, A.A. Plakseyev, S.B. Koshelev, Yu.A. Kuz'min, and V.N. Fedoseyev
18 Heat Transfer and Two-Phase Flow of Freons in Evaporators of Refrigerators
G.N. Danilova, V.M. Azarskov, B.B. Zemskov, A.A. Malyshev and V.K. Kirin

24 The Boiling Crisis (Dryout) Under Transient Conditions. Determination of the Onset of Crisis on the Basis of an Inhomogeneous Nonequilibrium Model of the Two-Phase Flow
Yu.N. Kuznetsov and A.S. Devkin
30 Prediction of Heat Transfer Parameters for Boiling in Flat Channels
A.I. Leont'yev, A.S. Okhotin, A.D. Korneyev and S.D. Korneyev
37 Investigation of Heat Transfer to Liquid Nitrogen Boiling in a Tube Rotating About a Parallel Axis
B.S. Petukhov, V.M. Zhukov and S.B. Anisimov
44 Heat Transfer in Evaporation from the Surface of a Capillary-Porous Body
S.L. Solov'yev and S.A. Kovalev
50 Heat and Mass Transfer in the Flow of Helium-II in a Film and Through Porous Baffles
V.A. Shaposhnikov, I.I. Mikhaylov, A.P. Grafov, A.V. Kortikov and D.G. Romchenko
56 Experimental and Numerical Investigations of Nonequilibrium Heat Transfer in Subsonic Jets of Dissociated Nitrogen
A.N. Gordeyev, A.F. Kolesnikov, S.N. Kubarev and M.I. Yakushin
63 Heat Transfer in and Efficiency of a Cooling Film Injected Through a Circular Hole
N.M. Alekseyev and A.A. Zelengur
69 Film Cooling Efficiency in the Case of Interaction Between a Wall Jet and a Countercurrent Flow
E.P. Volchkov, V.P. Lebedev and N.Ye. Shishkin
74 Effect of Natural Convection on Heat Transfer in Separated Turbulent Flow
G.A. Glebov and A.P. Kozlov
79 Heat Transfer in Turbulent Boundary Layers on Permeable Surfaces with Directional Injection (Blowing)
V.P. Motulevich, E.D. Sergiyevskiy, N.F. Shchitov and L.S. Yanovskiy
85 Heat Transfer in the Boundary Layer Behind a Shock Wave Traveling Along a Flat Wall
B.S. Petukhov, V.I. Zuyev and V.K. Shikov
91 Mixed-Convection Heat Transfer in Downtake Flow of Supercritical Helium in a Heated Tube at Transition Reynolds Numbers
V.A. Bogachev, V.M. Yeroshenko, O.F. Snytina and L.A. Yaskin
97 Transfer of Heat to Supercritical Helium in the Inlet Region of a Circular Tube Under Highly Nonisothermal Conditions
M.A. Valyuzhin and Ye.V. Kuznetsov
104 Comparison of the Effectiveness of Some Methods of Enhancement of Convective Heat Transfer
A.A. Gukhman, V.A. Kirpikov and R.D. Borisova
109 Effect of Thermogravitation on Heat Transfer in Up- or Down Pipe Flow of Supercritical Fluids
Yu.M. Dashevskiy, V.I. Mal'kovskiy, Z.L. Miropol'skiy, N.D. Sakovich and L.R. Khasanov-Agayev

115 Investigation of the Mechanism of Momentum and Heat Transfer in Rough-Tube Bundles
A.A. Žukauskas and R.V. Ulinskas
122 Experimental Study of Transient Convective Heat Transfer in Annuli
Ye.I. Kalinin and Yu.N. Kuznetsov
128 Heat Transfer in Yawed Tube Bundles
V.I. Katinas and E.E. Perednis
133 Experimental Data on Heat Transfer to Flows of Boiling Helium
V.I. Deyev, A.I. Pridantsev, V.V. Arkhipov and V.V. Solodovnikov
